## INTRODUCTION

Educational philosophies played an important role in all grades in the school I taught at in Saudi Arabia. Philosophies reflect how students learn, the subject matter, the materials to use, and the way teachers explain the lessons to students. According to the Ornstein & Hunkins (2013), "Philosophy becomes the criterion for determining the aims, means, and ends of curriculum" (p.29). In fact, the role of the educator's philosophy in the classroom, school, and society is very important in meeting the goals of education. Some teachers prefer to use modern technology materials such as computers.

## CONCLUSION

A good learning environment is important to attract students to think in class.

Therefore, the philosophy of education must contain clear lessons using technological devices and modern curricula to develop teaching methods for the curricula
